Welcome to big-city lab services right in your neighborhood.

There's no need to miss work or take a long drive when you require a medical test. Virtually any analysis you need can be performed by the Laboratory Services at Schuyler Hospital. Our staff will use the most up-to-date technology to get fast, accurate results, whether you give your sample at the hospital, your doctor’s office, or your nursing home. If you’re bedridden or recuperating at home, our phlebotomist will even come out to your house.

Schuyler Hospital is a 125-bed acute and 120-bed long-term care hospital providing services, including laboratory screening, to nearly 32,000 residents of Schuyler County and the surrounding communities.

Regular laboratory outpatient hours:
Monday - Friday  7:30am - 7:30pm
Saturday - 8:00am - 11:00am
Walk-ins served any time day or night, and day of the week.

To get answers to your questions, please call (607) 535-7121, ext. 2207.

“ I tell patients that a technician from a Boston University Hospital would feel right at home with the state-of-the-art facilities at Schuyler Hospital.”
We treat you like a person, not a requisition number.

At Schuyler Hospital, making you feel comfortable and relaxed is standard operating procedure. We get you in and out quickly, but also take the time to talk to you. In fact, our phlebotomists know most of their clients by name. And because we're open around the clock, we can accommodate anybody's schedule. For example, if you have a fasting test and your job starts at 6:30am, you can stop by at 5:00am and still have time for breakfast without missing work. Plus, we offer weekly collections at the Ovid Primary Care Center for the convenience of area residents.

Quality that's second to none.

The Schuyler Hospital Laboratory is New York State licensed and accredited by the Joint Commission. Our technologists and phlebotomists are all fully trained. Our size and efficiency allows us to routinely complete most tests within hours instead of shifts. For safety's sake, we phone, fax, and mail results to doctors, including many primary care physicians in Florida who serve our “snowbird” patients.

“Over the years that Cathy has visited my home to draw blood, she's become like an old family friend; she always asks about my grandchildren.”

Work-related screenings made simple.

A full set of pre-employment drug testing and DOT driver screenings are available through Schuyler Hospital Laboratory Services and the Montour Falls Primary Care Center. Our Medical Review Officer is licensed and certified, ensuring a proper chain of custody for legal proofs for these tests and breath alcohol levels.

Screenings available:

- Cholesterol and Glucose levels
- Coumadin therapy monitoring
- Lipid profiles
- Basic and Comprehensive metabolic profiles
- UTI screenings
- Strep throat cultures
- Prostate tests
- Anemia
- White Blood cell counts
- Hemoglobin and Hematocrit levels
- Pre-employment urine testing
- DOT driver screenings
- Breath alcohol levels (Montour Falls Primary Care Center only)
- Lead levels
