

For rehabilitation that takes the pain out of insurance coverage... we've got you covered.

While you're concentrating on what's most important – your recovery – let us take care of the details... including your health insurance. Schuyler Hospital's Rehabilitation Center accepts most major insurance plans. We also work with you: taking care of the paperwork by obtaining authorizations, providing evaluations and progress reports to your physician, and submitting claims on your behalf directly to your insurance company.

The next time you need rehabilitation, ask your doctor to refer you to Schuyler Hospital for personalized, quality rehabilitation close to home.

To schedule a tour or get answers to your questions, please call (607) 535-8616 to speak to one of our Rehabilitation Services professionals.

REHABILITATION SERVICES

We've Got You Covered.

Our Rehabilitation Department renovations are complete! Our new and expanded facility includes additional equipment and updated technology, as well as improved patient privacy.

Facing recovery and rehabilitation from an illness or injury is a challenging task, but you don't have to do it alone.

With over 120 years of combined experience, Schuyler Hospital's highly trained and licensed physical, occupational, and speech rehabilitation professionals provide a wide variety of specialties to give you the strength and skills you need to get back on your feet. With the majority of our therapists holding Master's degrees and constantly updating their skills by working toward advanced competencies and clinical certification, the level of expertise is second to none.

Schuyler Hospital offers the type of rehabilitation, quality and care you need within a short drive from home.

Our therapists work one-on-one with you, and in conjunction with physicians and other health professionals, to bring an interdisciplinary team and an unsurpassed continuity of care to your recovery. Our team will rally around you to understand your challenges, set and reach common goals and create a program custom-tailored to your needs to help you recover as quickly as possible.

Orthopedic Care

Working closely with orthopedic physicians, our physical and occupational therapy staff provides rehabilitation for orthopedic injuries or surgical procedures, including: spinal dysfunction and disorders of the foot, ankle, shoulder, elbow, hand, hip and knee. Our therapists are knowledgeable about your body's limitations after surgery or an injury and can help ensure a successful recovery.

Education is key to a successful recovery.

Physical Therapy

Our physical therapists evaluate and treat impairments that can arise from traumatic soft tissue injury, sprain, strain, stroke, acute and chronic pain, open wounds, neurological disease, and fractures.

Our sports medicine specialists assist you with strengthening, bio-mechanical analysis of movement, scar management, isokinetic exercise, plyometrics, conditioning, and counseling/education for return to sport. We also teach you how to decrease the risk of re-injury.

Occupational Therapy

Our occupational therapists provide analysis and use purposeful activity and exercise for limitations caused by injury or illness, developmental or learning disabilities, psycho-social dysfunctions, or the aging process. With a goal of maximizing independence, preventing disability and maintaining health, we want to help you return to performing everyday tasks to the fullest extent possible.

Our hand therapy specialists work with you post-injury, surgery or disease on scar management, strengthening, coordination, fine motor training and desensitization.
